tion, the amount of liquor sold to the drug stores was \$71,727, prescriptions \$281, and tax collected \$1,079, making a total of \$73,189.

RESOLUTIONS TO BE SUBMITTED TO THE U.F.A. CONVENTION

TO BE HELD IN CALGARY IN JANUARY—VARIOUS LOCALS FAVOR CHANGE IN MARKETING—OTHER IMPORTANT MATTERS TO BE CONSIDERED

A large number of resolutions for the U.F.A. annual convention which will be held in January at Calgary have been received by the central office of the organization and are now being arranged before being set up in print. Many of the resolutions relate to matters of interior economy while others deal with a great variety of subjects. Following is a brief summary of a few.

Victoria district political association suggests that the membership fee be raised to cover the cost of a weekly political newspaper. It also suggests that the organization should have a central office to coordinate all political matters.

Stethoum independent political association suggests that dual membership should be allowed so that members may join more than one local if desired and get an exchange of ideas. It also suggests that the organization should have a central office to coordinate all political matters.

Stethoum suggests any increase in membership fees on the ground that farmers are suffering through fall in price of wheat and increased fees would mean decreased membership.

McCaffrey local of Edmonton suggests a membership fee of \$4 for federal political association and 50 cents for local political association. It also suggests that a fund be established to be used for the purpose of handling farm products and suggests a cold storage plant be built as a start.

Co-operative marketing is also recommended by Stethoum local. It suggests that all farm produce be handled through one central organization. It also suggests that an advertising branch be opened at central office to carry on a system of weekly or bi-weekly circulars to all local advertising agents and grain, livestock, poultry, etc. The cost to be met by a fixed charge to U.F.A. members and slightly higher rates to farmers not in the U.F.A.

An international agricultural conference called by the Canadian Council of Agriculture to discuss various questions relating to international agriculture, trade and tariffs is advocated by Morris local. All farmers' organizations through the world to be invited to attend. The cost to be met by the local. It also suggests that a central office be established to coordinate all political matters.

Sheepmen to Contest the Hoadley Plan

Object to Ruling of Minister of Agriculture in Connection With Granting of Sheep—Legal Proceedings Trained

There appears to be considerable dissent among those of here over the recent ruling of Hon. Geo. Hoadley in connection with the grazing of sheep. Hereafter farmers owning land were allowed to run a certain number of sheep on the open range in proportion to the land they own. Mr. Hoadley has changed this. In fact, he has ruled that the sheep must be grazed in the same manner as the cattle.

The sheepmen are planning to fight Hon. Geo. Hoadley's order. They are planning to run a certain number of sheep on the open range in proportion to the land they own. Mr. Hoadley has changed this. In fact, he has ruled that the sheep must be grazed in the same manner as the cattle.

Mr. J. D. Watson, of the Knight-Watson Co., one of the biggest sheep-owning firms in the province, was in court Saturday and said the legal battle will be carried to the Privy Council if need be.

Mr. C. T. Wright, of the provincial police, has charged J. W. Williams again with raising sheep at Lethbridge. He is in the court for the fight on the ground that Hon. Mr. Hoadley's order is ultra vires in that it was not a duly elected member of the cabinet and minister of the Crown when he made the order. He has been appointed minister of agriculture but has not been re-elected as required by law.

Hon. Mr. Hoadley is a horse rancher and the sheepmen feel that the ultra vires order is a slap in the face to the sheep industry. They are planning to run a certain number of sheep on the open range in proportion to the land they own. Mr. Hoadley has changed this. In fact, he has ruled that the sheep must be grazed in the same manner as the cattle.

Macled association calls for an investigation into the cause for so wide a spread between No. 1 northern and No. 2 northern wheat. It also suggests that the government should have a central office to coordinate all political matters.

Sask. Government To Investigate Wheat Question

Price Milling Is Held on Value of Wheat in Terms of Flour—Think Tough Wheat Makes Good Flour

As farmers in Saskatchewan claim to be selling their grain for less than the cost of production, the government of the province is contemplating action which, if successful, will mean millions of dollars to the now distressed agrarians. Briefly the government proposes research into the milling process of wheat, with the object in view of securing for the farmer a price based on the value of his wheat as ground in flour.

All these resolutions will come before the U.F.A. convention for consideration and action.

How to Make Home Brew

Chase a bull frog for three men and gather the hops. To the hops add the following—10 gallons of hot water, one half pint of ash, a bar of brown soap. Boil the mixture 30 hours.

Office Stationery is up to date style and is held at the Review.

The Review can handle anything in the Job Printing line you may require.

U.S. Farmers Try To Stabilize the All Grain Prices

Would Have Steady Market as Demands Warrant and Direct Contact With Mills and Consumers.

The farmer leaders of Western United States have been working on plans for economic betterment for the last several years. Their efforts culminated in the formation of the United States Grain Growers, Inc., a non-profit, non-stock association, to handle and sell grain to its farmer members. This company will try to stabilize grain prices by steady marketing, as demands warrant, and by direct contact with mills and consumers; eliminate short-selling and manipulated markets by keeping the grain in farmer control until sold to a legitimate buyer; export or pool for export; the surplus of bounteous harvests to keep the grain processor from beating down harvest-time prices; furnish credit through the Farmers' Finance Corporation to grain growers who do not want to sell at harvest time; supply eligible new world grain to the clean, mix and re-grade the farmers' grain in farm-owned conditioning plants; eliminate unnecessary and duplicated handling charges by shipping directly from the country stations to the mill or exporter; and promote the savings made by their trade device back to the farmer in proportion to the grain he markets.

Atabaska and Slave River District

The all producing possibilities of the Mackenzie district have awakened interest in Northwestern Canada to such a degree that an active demand for information regarding the undeveloped resources of the various localities is reported by the Department of the Interior. In order to provide authentic information with respect to the Atabaska and Slave River districts the Department, through its Natural Resources Intelligence branch, has published an interesting report on the natural resources of the territory. A map of the district, providing further particulars with respect to transportation facilities and general topography. A copy of "The Atabaska and Slave River Districts" may be obtained free upon application to the Superintendent of the Natural Resources Intelligence branch, Department of the Interior, Ottawa.

Steps are being taken towards the establishment of a coal bargeing industry in the Edmonton district and in other parts of Alberta. The estimates are being secured on the cost of the necessary machinery for the plant. It is expected that the first of the Atabaska bargeing plants will be used as a barge in the winter, the manufacture of which will begin in the spring and will, some time next summer.

CHRISTMAS HOLIDAYS IN THE CANADIAN PACIFIC Old Country

Spend a Real Merry Christmas with the folks at Home THROUGH TOURIST SLEEPERS Direct to the ship side. No Change of Cars. No Delay.

Travel in comfort via the dependable route of the CANADIAN PACIFIC RAILWAY

would be to the benefit of the U.F.A. as a whole if this present local were divided into three. It would be easier for the members to attend all the meetings throughout the year. After considerable discussion it was moved that one of the proposed new locals would meet in their respective districts and give in their report at next regular meeting, which will be held at Letus school at two o'clock, Nov. 19th.

Mr. Perrin R. Baker, minister of education for Alberta, impressed the audience on the need of teaching the young folks and the great value of an education when he addressed a meeting at Lethbridge on Saturday.

Order-in-Council Extends Leases

Holders of grazing leases in Manitoba, Saskatchewan, Alberta, and the Peace River block, British Columbia are now entitled to four years' notice in the event of their having to relinquish the land, instead of three years, as heretofore. The regulation has been made by an Order-in-Council on the representation that three years is not sufficient time in which to enable a rancher who receives notice of cancellation to bring his stock to maturity or dispose of them at advantage.

Special Clubbing Offer

THE CANADIAN POWER FARMER and the

REDCLIFF REVIEW for 1 Year, \$2; 6 Mos. \$1

YOU CAN GET 150 MORE FOR A BUSHEL OF WHEAT

That Is What You Can Do Provided You Take Advantage of Our Offer

We have made arrangements with the E. H. Heath Co. Limited who publish the CANADIAN POWER FARMER whereby we are able to offer that farm magazine together with our own weekly at the one price for both papers.

The CANADIAN POWER FARMER is Western Canada's biggest farm monthly. It is now in its twentieth year which means that it is thoroughly established throughout the West. It deals with the mechanical side of the farm. Every issue is full of helpful hints and experiences on the operation of all kinds of farm machinery from a washing-machine to a tractor. Its editor has just completed a trip of several months over Western Canada in a motor car for the purpose of studying the mechanical side of the farmer. He visited the farmers, lived with them and worked with them. The results of his trip will appear during the next twelve months.

This offer may be withdrawn at any time. Without doubt your intention is to renew for this weekly, then why not take advantage now. Your subscription to this weekly together with a year's subscription to THE CANADIAN POWER FARMER for the same price as this weekly alone. This is a value which you can make \$1.50 on a bushel of wheat.

Mail your cheque or drop into our office the first time you are in town.

Maintaining Efficiency Of Agricultural Land Is Greatest Problem

C. H. McDowell, speaking recently before the Chicago session of the American Chemical Society, made the following among other statements, which Canadian farmers would do well to ponder.

"The explosion of the huge chemical works at Oppau, where fertilizers were made through the fixation of atmospheric nitrogen, has demonstrated to the world the great resources for replenishing the richness of her fields which Germany had at hand."

"Although our country is 15 times as large as Germany," said Mr. McDowell, "we produce only the same amount of barley and not quite twice as much oats. Germany produces six times as many potatoes and 15 times as much rice. When the war broke out, Germany had five millions of farms, averaging 15 acres, and had 6,540,000 farms, averaging 138 acres. These German farms produced 40 per cent. more wheat, rye, barley, oats and potatoes, taken together, than we produced. Within the last 20 years Germany has increased her yield per capita from 15 to 20 bushels, while the United States increased from 14 to 16. Germany increased her per acre yield of wheat from 19 to 20 bushels; the United States from 13 to 15 bushels. Germany increased the yield of barley from 24 to 34 bushels; the United States from 24 to 26 bushels. With only one-fifth of the land area, Germany has produced 100 per cent. more of her agricultural products than we do at times that of the United States."

"We are at the present time on trial in our United States agriculture," continued Mr. McDowell. "With a sparse population and a broad area of uncultivated land, a nation depending on extensive and intensive agriculture, but with a densely populated country there is a need for intensive methods to be followed. We of the United States have been a wasteful people. We have used much land and have moved from State to State in search of the more fertile soils of land, and neglected to maintain the producing power of our conquered area."

Large populations and low crop yields," added the speaker, "do not go together. In this country our population is rapidly growing and we must more fully utilize our land. It is our future development. Our population is increasing and our lands at the same time are being depleted. Our duties are all lined with the fertility of our farms that they were dug to drain. From our rivers we lose annually 500,000,000 tons of fertility, thereby diminishing productivity at a rapid rate. Our sewer pipes are taking from our farms 500,000,000 tons of fertility annually. The crops that are taken from the field, and never return to the soil, form take 200,000,000 tons of fertility from our lands each year."

"In the face of these conditions," declared Mr. McDowell, "our population will be, according to Mr. Edward M. East, of Harvard, more than doubled by the year 2000. At the same time he shows that, according to our present methods of agriculture and our present rate of food and clothing consumption, 137,000,000 is our ultimate population limit."

Mr. McDowell urged that the time had come for the engineer, and especially the chemist, to consider what must be done to maintain the agricultural efficiency of the country and to replenish the soil. The engineer must aid in preventing erosion of the land and the devastation of the forests, while the problem of the chemist is fertility.

The speaker closed by saying that unless these vital problems were solved in the near future, coming generations will find their food supply resources to a point where degeneration of the race sets in, and he said he conditions here similar to those now obtaining in the Orient.

Vancouver Firm's New Industry.
Monette Products, Limited, will shortly commence manufacturing building materials from smelter slag, decomposed granite and other waste. A brick from sand and sawdust is also to be made and a patent which it is claimed, is being sought.

First to Cross North America.
Mr. Alexander Mackenzie, of the North-West Fur Company, was the first man to cross North America by a route north of Mexico. He reached the shore of the present day British Columbia on July 25, 1782.

Three Die Every Two Seconds.
There are about 1,500,000,000 inhabitants on the globe. Of these 50,000,000 die every year, 187,738 per day, 5,595 per hour, about 93 per minute, or three in every two seconds.

W. N. U. 1291

The Accident of Birth

No One Can Choose Their Nationality Or Position.

A deer isn't necessarily a deer because of choice. A bird can't help being a bird, or a toad a toad, or a lizard a lizard, or a snake a snake. They are what they are because they had no word to say about their creation. They have to be just what they are, even as you and I.

"And the moral is that you should not feel above other people because of the accident of birth, for you had nothing whatever to do with it. Through the miracle of reproduction everything is born, and what it happens to be, it is because he is a 'nigger' because he wants to be a 'nigger' but because he finds himself here on earth with a black skin and can't change it."

So it is well not to belittle another because he is a Jew, or a German, or a Swede, or an Italian, or a Chinaman, or whatnot. It is well not to look down upon some nation because he or she is homely or poor or lame or weak-minded. It is well not to kill or to be killed, for it makes no necessary demands of it.

"Don't say you might be a Jew or a German or a Swede or an Italian or a Chinaman if the proposition from which you sprang had happened to be allotted to you by the Creator."

You might be a toad or a lizard or a snake or a deer, and surely it would be cruel for some one to beat you to death with stones or clubs, or shoot holes in you with a gun.

Whatever you are, try to be a good one. Don't take advantage of the accident of birth to ridicule or to hurt other things unless necessarily calls for it. Life is a precious possession, and so is happiness. So long as you want to live and be happy, why not let other living creatures live and be happy too?—Herr Moses in Newspaper.

World's Biggest Clock.
Liverpool, Eng., claims to have the biggest clock in the world. Its dial is 25 feet in diameter, two feet more than that of "Big Ben" in the famous Westminster clock. Its hands are 3 feet longer and the size of its numbers are 3 feet as against Big Ben's 2 feet.

Too Good a Shot.
"Brown is a good shot, but he's 'Very good. We were practicing with our guns at my country place the other day, and he hit the bull's eye the first time." "Very clever."

"Yes; but he had to pay for the bull."

Potatoes seldom grow larger than marbles in Greenland.

Discover New Klondike

Rich Gold Strike Made at Cariboo, B.C.

Old miners who have just arrived from Cariboo say that a small new Klondike has been discovered there. A very dry gold surface has been found but there is no information as to how about how extensive it might be. Eight miles from Quesnel dam on old creek bed has been prospectively secured. Several very large nuggets have been found and individual miners are taking out as high as \$100 a day. Great excitement prevails in the Huron and Cariboo district where several millions of dollars were taken out of the placer workings of the earth with a few weeks.

Many claims have been staked and arrivals at Ashcroft state that nuggets and coarse gold worth \$1,000 were secured by one man.

Restore Citizenship Of Japan Graduate

Dr. Eschoo Has Been Practising Medicine In Persia.

Dr. S. O. Eschoo, who graduated from Queen's University 11 years ago, and has since practised divinity and medicine in Persia, has been given permission to enter Canada. His citizenship had been lost during the war and on his arrival at Vancouver via the United States, he was challenged by the Immigration authorities.

Friends in Toronto interceded on his behalf, and the Department of Immigration has restored his Canadian citizenship. Dr. Eschoo's wife was killed in a raid by Turks during the war.

Warships For Sale

Buyers Must Guarantee They Will Break Up.

There are about two hundred obsolete warships which the British Admiralty is not going to keep in the British fleet. Anyone can buy a battleship or light cruiser if he is willing to give a guarantee that it will be broken up and not used for war purposes. Every part of a ship is dismantled and disposed of, and all the better scientific instruments are sold. It takes forty men twelve months to break up a warship. Those ready for disposal belong to the 1900 to 1903 classes, and include Dreadnoughts and lesser types of vessels.

Instead of cash, the missionaries in Australia ask the farmers for grain.

Rest in wood gives twice as much heat as the wood itself.

Country In Vicinity Of Nelson River Suitable For Farming

Edison's Snow

Eating Device
Machine Will Push Snow Into Compact Key Blocks.

Engineers interested in snow removal from city streets have considered perfecting a machine built forty years ago by Thomas A. Edison, but left in an experimental stage because the inventor turned his work into other fields.

This machine, drawn by a horse, devoured the flakes and disgorged them in key blocks which occupied only one-third the space of the fallen snow and made removal easy. In a letter from Mr. Edison, recently read at a forum on "snow removal in cities," the inventor expressed belief that a competent engineer could reduce the figure out an efficient means of improving and modernizing his invention.

Stocktaking Of Forests

Time Is Never Spent On Calculating Timber Position.

Many times of thousands of pounds are spent every year in calculating the world's cereal crops. Yet in the case of forests by the natural law of supply and demand a few seasons' effort can meet the world's requirements. I would ask you to consider how much money is spent in the whole Empire in calculating what will be the timber position in ten or twenty or fifty years' time. Yet to plan, estimate, mature and harvest a timber crop will rarely take less than a century.—Lord Lovat at Empire Timber Conference.

A drop of the oil of kindness for a complaining neighbor has the same effect that a drop of oil has on the squeaking, complaining wheelbarrow.

We can only have the highest happiness by having wide thoughts, and much feeling for the rest of the world as well as for ourselves.

Nothing is firm but the positiveness of truth. Don't make positive lies that are not true.

The average man can lift one and a half times his own weight.

Historic Events at Annapolis Royal

At the two posts there is nothing except the stone walls of the Citadel, Bay and the Lammson-Hubbard Companies. In addition to the mission station, as the Sicilian mission is called, are the aborigines, believe in the simple life and do not indulge in either houses, tents or tepees. As a general rule they erect simple tepee poles and cover these with brush, which is about the most modern style of architecture they indulge in. No sign of human habitation of any kind, outside the post buildings, is to be seen along the shore.

At Port Lard, the R.C. missionaries are now erecting a very fine mission hall, all of which is being hand-made. The logs are whipsawed in the river into boards and then hauled out to the site to be erected. In addition to the school, and a band of missionaries, there are about 15 or 20 prospectors in the country, many of whom are trying out the bars on the Michaud. When coming down stream in August the "Lady Macbeth" met Messrs. Lard and Macbeth, in the vicinity of the Mitchell River, tracking their course upstream by means of the old fashioned wheel lines. Mr. La Plair has been in the Nahant area for the past five years, and is of the opinion that it will be recognized before long as the most important mineral area in the northwest.

During the past spring a number of travellers were sent from Port Simpson to the overland route to the Peace River country via the Nelson and the Liard Rivers, and by utilizing the overland route the Nelson were down at Norman House weeks before the steamer traffic reached the oil well due to the fact that the Mackenzie below Port Simpson is open earlier than the Great Slave Lake. At Port Nelson, Captain Currie met Mr. Murray, superintendent of surveys, under the charge of Duncan Macdonald, an old timer of the Dunvegan country.

Manitoba Will Be Represented.
A carload of horses and one of cattle, and a carload of sheep sent from Manitoba to the international exposition at Chicago in December. This was decided at a meeting of the executives of the Canadian Horse Shows Association. The association held recently no sheep will be sent.

and dance in the same place. All are invited to attend.

A number of young men in town are desirous of forming a club something similar to what had in Redcliff a few years ago, and having a central place where they can meet to spend their leisure hours. For the purpose of discussing the advisability of forming such a club a meeting will be held in the G.W.V.A. rooms on Monday evening next, Nov. 21st. All interested in the formation of such a club are invited to attend.

THE CHURCHES

Every one invited.
David Hollinger.

BOY SCOUT NEWS

As soon as the meeting was called to order by the Scoutmaster last Thursday, the fourth patrol was asked to say the Scout Promise and then the Scoutmaster gave out some new drill last night.

Mr. Messenger, our physical drill instructor, gave us some patrol drill last night.

Mr. Messenger has been decided to reorganize the patrol again as some patrol officers have been decided to resign.

Last Friday the Boy Scouts met at the scout hall at 7:30 sharp, and from there marched to the Great West-Vestry rooms to attend the unveiling of the flag.

questioned to do so by the ratepayers. All this is good sound advice and should be acted upon.

I must confess that heretofore I have not taken a very keen interest in municipal elections in the past, but after what occurred at a public meeting here last Friday evening, I think I am high time the ratepayers of this town to take more interest in these matters in future.

The disgusting exhibit on the occasion referred to should have been shown in the minds of every citizen of this town as to the absolute necessity for a change in at least one of our town officials.

They say a chain is no stronger than its weakest link, neither does a town as a whole stand any higher on the social and moral ladder than do its citizens. Why then should we be content to sit still and be handled and disgraced by those who have no respect for themselves and no regard for the position they occupy?

Again, I say it is time the ratepayers of this town stepped up to their duty and responsibility.

A PATENT TAXPAYER.

BIRTHS

SIDAM—In Redcliff on Wednesday, Oct. 30, 1921, to Mr. and Mrs. Philip J. Sidam, of Gloucester, a daughter, M. McLaughlin.

McLaughlin—In Redcliff, on Thursday, Oct. 20, 1921, to Mr. and Mrs. J. McLaughlin, of Ipswich, a daughter.

A company to develop the flax fibre industry in Manitoba has been incorporated with a private charter, according to a notice appearing in the local press.

Arrangements are being made by a new enterprise to purchase the old mill factory at Neepawa. This will be the first of a number of factories which the company expects to operate in the west.

Now is the time to look up the best men for the civic election.
